MITOCORE

IMMUNE HEALTH

Creating Abundant Cellular Energy

Every cell in the body needs energy to function properly. This is especially important during health challenges, when energy demand is higher. MitoCORE is a scientifically formulated blend of nutrients and protein, specifically designed to recharge cellular energy production, increase antioxidant protection, support detoxification capacity, and support immune function.

1. Foundation

Micronutrient Essentials

Cellular energy production requires adequate nutritional cofactors. MitoCORE provides key micronutrients to ensure the cycle of energy production is established.

2. Ignition

The Power Trio

MitoCORE works by combining active doses of acetyl L-carnitine, alpha lipoic acid, and N-acetyl cysteine to recharge cellular energy production and increase antioxidant protection.

3. Protection

Bioactive Phytonutrients

MitoCORE provides plant compound “signals” to stimulate proper mitochondrial function and guard against mitochondrial degeneration.
